

Good Morning, Liz

I think it would be fair to put you in the picture. Bob Pledger is the

Induction Loop specialist at the RNID. I had been pressing him and Bob

Dumbrell on implementing the works. You can see that he appears to be having problems with estates.

This matter reached the Court as long ago as July 2005 and things are

dragging on. I do not know the facts but it could be that the council is

dragging its feet. You will see from the DDA dossier on my blog that the

latest Court Order said I must return to court by May (I think) otherwise

the case will be dismissed.

You know that I am not litigious but rather patient. However if I don't get

any indication soon that the council is serious about implementing the Court

Order then I must consider returning to Court for a new Order.

I would be grateful if you would draw the attention of your colleagues in

other departments of the importance of obeying the Court Order. The are

implications in costs and bad publicity if I have to go back to court. Can

you bang a few heads together!

In the interest of openness I have copied this email to both Bobs.

Thanks

Yours, Colin
